DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

On page 6, lines 6 and 7, "having greater than the arms 8, 9" is not understood.

On page 6, line 14, "Fig. 2" should read --Fig. 3--.

On page 7, line 3, "legs 4" should read --legs 5--.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

There is no basis in the specification for "element" (claim 1, line 8) and "mounting means" (claim 1, line 12).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 to 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 2 recites "means for attaching the hose cartridge". However, it is not clear to what structure the hose cartridge is intended to be attached.

In claim 1, paragraph 4, the syntax is poor. What structure is "provided on said peristaltic pump"? Is it the "mounting means" or the "means for attaching the hose cartridge"?

Art Unit: 3746

In claim 1, line 20, to what structure does "lateral face" refer?

In claim 1, lines 20 and 21 recite that the hose section "enters said cartridge housing". This is inaccurate because the hose section does not enter the cartridge housing, but wraps around it.

In claim 3, line 4, there is no antecedent basis for "the fourth lateral face".

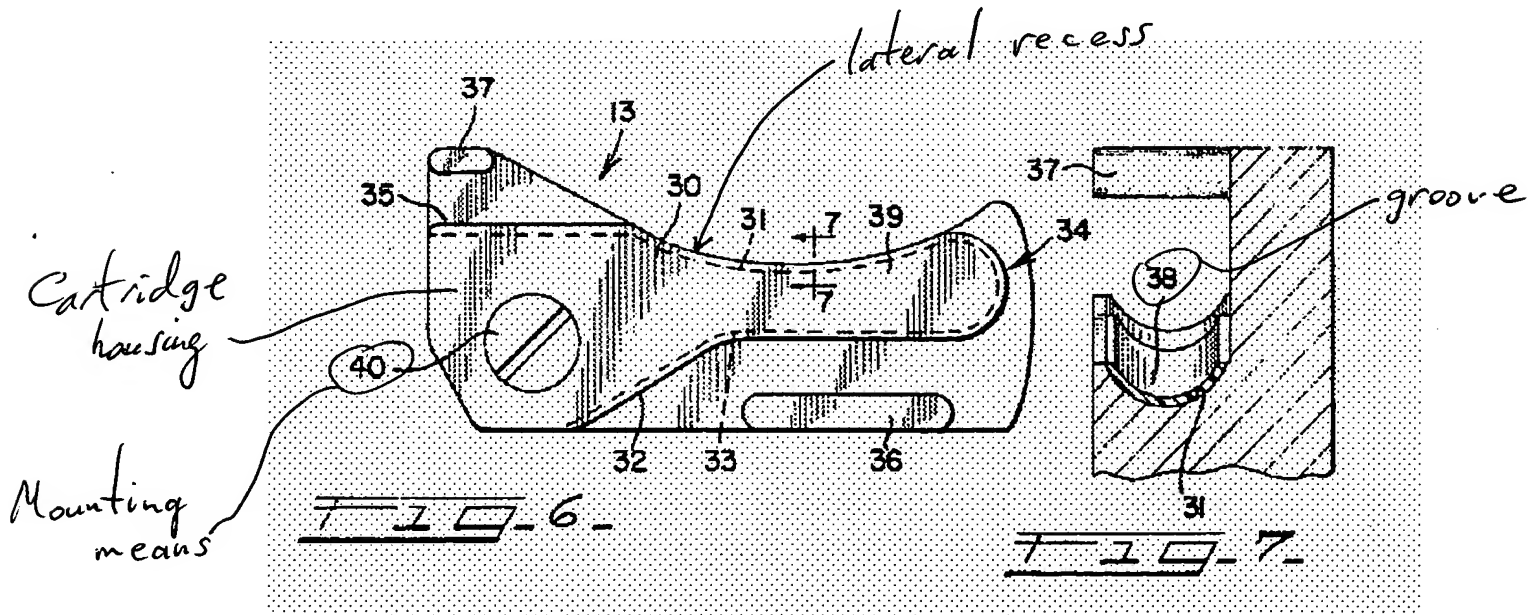

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Adams. See annotated figures of Adams reproduced below.

Art Unit: 3746

Allowable Subject Matter

Claims 3 to 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
